# Waterless Wash & Shine

Cleans Shines & Protects

is Xtreme Green's® special lubricating, anti-scratch formula which surrounds and safely lifts dirt particles onto the towel and away from your paint, leaving behind a shiny coating that helps protect your paint, and makes it easier to clean next time.

Xtreme Green's® Waterless Wash and Shine is an environmentally friendly, citrus-based formula which saves, time, money, and the planet's most precious resource, Water! Perfect to use anywhere, anytime - Simply spray on and wipe off. It takes only 15 minutes to wash an average car, leaving it clean, shiny, and protected.

## ADVANTAGES

**No water buckets, hoses or soap needed.**

**Easily cleans bugs, road tar, tree sap, bird droppings, and water spots.**

**Special lubricating agents leave a "just waxed" shiny finish that protects and beads water for up to 4 weeks.**

**Safe for use on all painted surfaces, chrome, and glass.**

More Convenient than Washing Your Car with a Bucket and Hose

Faster and Cheaper than Going to a Car Wash

Ideal for Quick Touch up in-between Washes

Quick and Easy to Remove Bugs, Tar, Tree Sap, and Bird Droppings

# HUNDREDS OF USES...

EVERYTHING INCLUDING YOUR SHOWER DOORS

CARS

BOATS

MOTORCYCLES

WORKSHOP

PWC

ATVS

APPLIANCES

CARAVANS

## HOW TO USE

### Directions:

- Shake can before use
- Pre-soak tough stains for 30 seconds
- Holding the can 12 – 15 inches from the surface, spray a two by two foot area. For light dirt, lightly mist the area. For heavier dirt, spray liberally.
- Wipe clean using a folded terry cloth or micro-fiber towel
- Flip towel or use a clean towel to quickly buff to a high-gloss shine

### For Best Results:

- Spray some product directly onto a cloth to ensure full coverage before wiping
- Avoid using in direct sun or when surface is hot
- Take extra care with car windows to remove any haze which could impact visibility

### Where to use:

- Ideal for paint, chrome, glass, stainless steel, aluminum, tile or plastic surfaces.
- **Do NOT** use on vehicle controls (pedals, grips, steering wheels), bench or cycle seats, motorcycle or bicycle tires, floors, bathtubs, or other surfaces where slipperiness may be hazardous. To avoid spraying brake rotors, do not spray on wheel rims or overspray tires.
